

We are inviting you to a very special Event for a network/leadership/clean energy forum.

This FREE Event is October 24th, and is going to host a lot of great guests including the Korean Consulate General, representative from the Governor's Office, Korean and American Scientists, Mayor Hogan, Congressman Mike Coffman, President of the World Trade Center Denver, and more.

We have great speakers who have amazing experience and successful careers from Business & Trade, Energy Sector, Scientists from NREL and Korea, Professors from Universities, and Leaders from the Economic Development field.

We are creating a great opportunity for Professionals, Entrepreneurs, College/High School Students, and Teachers to network with all these spectacular speakers; learn how to do business with Korea, be educated about Renewable Energy, and opportunity to learn about Korea.

On top of that, the Event is FREE (with free lunch) and are doing drawings to help pay for text books for students.

Register TODAY!
